Data management day today. Let's create a new dataset and edit another

New dataset:
OBIS Marine wildlife Balic Sea, by OBIS under public licence in English
Northon Grahms is a resource contact (n.grahms@obis.org, OBIS, node manager) and Karen
Wilde as well (k.wilde@obis.org, researcher)

Pieter Deroo will be metadata provider, also working for OBIS as researcher
(p.deroo@obis.org)

Keywords for this dataset are: North sea, marine wildlife, Northern hemisphere

You realise you've forgotten to add the resource creators. Demonstrate where you would
look to change this.
(Note: functionality not available in this demo, we're looking to see if you'll find it)
